

## Artemide

Artemide Group is a worldwide leader in high range residential and professional lighting. Located in Milan, the company operates through a large-scale commercial organisation which takes the form of subsidiary companies and specialised distributors, and boasts a distribution network which includes mono brand showrooms in the most important cities worldwide and shop-in-shop in the best lighting and furniture stores.

With numerous plants, to guarantee the highest level of quality through the accurate and complete control of the production process, Artemide is structured in two Business Divisions – Design & Architectural. The very recent acquisition of Nord Light has enabled Artemide to further strengthen its ability to penetrate the market, relying on a range of LED technical appliances of the highest standards and a structure fully dedicated to the design and production of tailor-made lighting projects.

Artemide was founded by Ernesto Gismondi & Sergio Mazza in 1960. The ongoing commitment to research and technological innovation, collaboration with the best designers around the world, and continuous communication and advertising have made Artemide one of the world's best-known and celebrated lighting brands, synonymous of Design, Light and Made In Italy.

### Picto LED

Directional spotlight using LED 1x19W with monochromatic emission with Warm White (3000K) or Neutral White (4100K) tones. Two-coloured aluminium body comprised of an optical and power supply unit. 2 versions available: with three-phase track adapter, and with base plate for ceiling mounting. 2 finishing options available: black/white and white/anthracite grey. Aluminum optics with choice of two beam spreads: 2x10° or 2x20°. Tilt angle of up to 90°, rotation of up to 355°. Light source and electronic control gear included. Complies with standard EN60598-1 and other specific standards.

### Tagora

A range of ceiling lights available in three diameter options (80mm, 270mm and 570mm), using 12v halogen, metal halide, fluorescent and 230-240v led lamps. Aluminium body with 3 mixed colour options: beige/white, grey/white and black/orange. The Tagora 570 version comes with an opaline polycarbonate diffuser, anti-uv treated. Hit version includes protection glass. Lamps can be maintained without the need for tools. Electronic control gear, with or without dimming (dali-switchdim), and emergency lighting. This fitting complies with standard en60598-1 and other specific standards.

### Ourea

A range of suspended lights available in 2 size options (ø156mm and 410mm) using 12v halogen, metal halide and fluorescent lamps. Body in aluminium, super pure aluminium optics and protection glass for hit version. The fluorescent version comes with a prismoptic diffuser. Quick adjustment steel suspension cables. This fitting complies with standard en60598-1 and other specific standards.

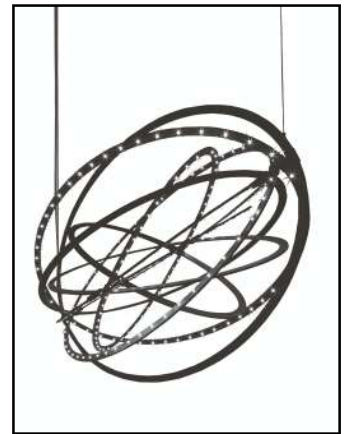

### Algorotimo

Algoritmo sets a new trend in lighting design. It's more than just a tool for illuminating and shaping architecture, Algoritmo becomes in itself an integral element of the architecture. Its sharp lines and minimalistic design make it suitable for any architectural environment within commercial and domestic projects, and with multiple installation options it provides an endless choice of lighting solutions. Algoritmo has no limit: is available as a single luminaire (Algoritmo stand-alone) and as a modular system (Algoritmo system) with ceiling recessed, wall recessed, ceiling mounted, wall mounted and suspended installations, and as a walk-over ground recessed lighting system (Algoritmo floor). The product offers many combinable lighting options:

- diffused lighting in continuous light lines without shadows thanks to the use of t16-seamless fluorescent lamp technology
- dark light emission with controlled luminance optics
- diffused or wall washer light emission with high performing monochromatic LED in neutral white & warm white & with RGB LED
- accent lighting with the use of pad, a projector using monochromatic high-performing LED with lenses

### Copernico

Nine concentric mobile ellipses obtained from a single aluminium plate support a circuit of 384 white LEDs; the ellipses rotate independently on two different axes, enabling the light emission to be directed and numerous spatial configurations to be obtained at the same time. When the device is closed it is completely flat.
