### Searching for the Unusual??

#### IP66/67 Floor Boxes

Certified Waterproof and Dustproof

(Please see photographic sequence right).

Sequence (i)-(vi) shows in-screed floor box in various stages of assembly. This is typical for all boxes irrespective of the tile insert depth. (vi) This demonstrates the 'daytime' lid - optional.

Exploded view of IP66/67 In-screed Floor Outlet Box

#### Key Questions

- Screed depth?
- Box content?
- Tray depth?
- Material to be installed in tray?
- Thickness?
- Anticipated heaviest load (weight) likely to run over the box?
- "Daytime lid"?

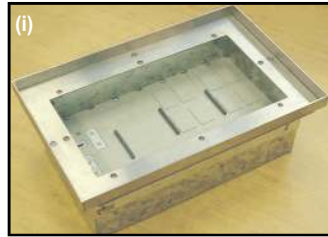

#### Flush Floor Box Solutions

(Please see photographic sequence right)

Required in raised or screed floors where only the 2mm rectangle, generally in stainless steel, is to be visible with the floor finish in the centre. Key questions similar to above.

#### Boardroom / Hotel Room Modules

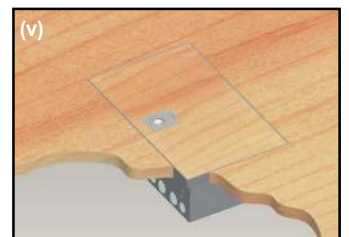

These modules generally call for a detailed initial discussion in the first instance. Please contact 020 8867 3500 to progress. The table manufacturer may well need to be involved to facilitate complete integration.

#### Flush Floor Box Solutions

Sequence (i)-(v) shows the variety of options which may be fitted to a floor box including terminal blocks for up to 10mm square cable and 32/40 amp Harting connectors.

Includes ring pull handles specified for this project.

#### Boardroom / Hotel Room Modules

Finished in brushed stainless steel & fitted with socket outlets, VGA connector, speaker jack, UTP cable & plug outlets & Krone Cat 5e sockets.
