

## Emergi-Lite Safety Systems

As a renowned manufacturer of innovative emergency lighting, fire detection and alarm systems and safety equipment Emergi-Lite Safety Systems, part of the Thomas & Betts group, has served the safety market in the UK for nearly 20 years.

### Emergency Lighting

- Emergency Luminaires (LED, fluorescent, tungsten halogen)**  
 A comprehensive range (exit sign & surface/recessed products) are available for any application, from hospitals & schools to warehouses & offices.
- Serenga LED Emergency Lighting**  
 Integrating LED advances in light sources & compact modular electronics Serenga is a stylish & high performance escape route solution. The Serenga Sun-Lite provides compact LED recessed & surface mounted downlight emergency lighting for escape route/open area applications, while Serenga Escape is the sleek range of modular LED exit signs.
- Horizon Low Energy, High Output Lighting**  
 A cost efficient low energy LED exit sign & emergency luminaire range, combines enhanced light optics & modular design for easy installation delivering harmony across the entire design scheme.
- Aqualux Heavy Duty, High Output Lighting**  
 Aqualux is a contemporary, high performance, high output emergency lighting range for heavy duty use. Specifically designed to deliver exceptional light output & excellent spacing, even in large scale open areas such as warehouses, car parks & sports halls.
- Endurance Long Life Emergency Lighting**  
 Stylish enough to look good in the most prestigious of projects, the Endurance range of exit signs & bulkheads are versatile enough to fit into the most awkward of space & benefit from leading edge technical design.
- Special Assistance**  
 Emergi-Lite innovative systems include Guide-Lite, a proven low location emergency lighting system, & Help-Lite, specifically designed for hospitals, care homes or similar facilities.
- Testing Systems**  
 The new Naveo, web based system running 'Central' is an addressable central testing system of extensive capability. IR2 Infra-red testing suite is safe, fast & easy to use. It's a cost effective solution for maintenance & offers a simple walk test procedure via a hand held transmitter or handset. Central is an addressable central testing system of extensive capability.
- Central Battery Systems**  
 Emergi-Lite manufactures both AC-AC & AC-DC central battery products. EMEX Power is the advanced range of modular AC/AC static inverter ranges, which can also be supplied with the EMEX Test testing system.
- Conversion Services**  
 Emergi-Lite manufactures inverters & chargers kits for mains lighting conversion. Expert conversion work, registered under ICEL 1004 is fully guaranteed and CE marked.

### Fire Detection Systems

Emergi-Fire is the fire safety products brand within Emergi-Lite Safety Systems

- Conventional 4-wire & 2-wire Fire Detection Panels**  
 Designed to configure both 2-wire and 4-wire systems, with 4-16 zone panels, Eurofire is a conventional, non-addressable system incorporating enhanced safety, technical & practical features. Complementing this is the Firetec system offering practical, cost effective fire safety solution for smaller to medium sized premises.
- Analogue Addressable Fire Systems**  
 With enhanced capabilities for installations where extra intelligence & flexibility are required Emergi-Fire provides analogue addressable fire systems with an array of user & installer-friendly features. The powerful Anatec Pro system provides extensive networking, complex sounder & control functions & 500mA output per loop. The expanded Anatec-Lite range further maximizes cost efficiency & functionality.
