

Flowcrete UK, located in South Cheshire, is the Commercial Sales and Manufacturing Centre for our Specialist Resin Flooring operations, supporting Commercial, Industrial and Domestic flooring projects across the UK, Ireland and beyond.

Supplying world-class Seamless Flooring, Flowcrete is renowned for transforming a wide range of environments with innovative Industrial and decorative Commercial Resin Coatings as well as self-levelling Isocrete Floor Screeds, Under Floor Heating, colourful Car Park Decking and now sub-floor Acoustic Insulation, Naturewalk, FlowSport, Floorgraphix and Flowfast Rapid Transit Systems.

Flowcrete UK's ambitious and dedicated team is inspired by excellence in people, products and service as well as continual innovation and sustainable growth. Our in-depth understanding of the resin flooring industry combined with our passion for creating efficient and engaging environments all come together to satisfy our corporate aim – 'to deliver the world at your feet'.

Prestigious clients such as **Mars, Nestle, Astra Zeneca, GlaxoSmithKline, Nokia, Jaguar, Bentley, Marks & Spencer, Tesco, BP Amoco and BAA** are amongst the many world class companies able to confirm Flowcrete's commitment to engineering the perfect flooring solution every time.

Our floors are installed to a very high standard by a network of fully trained and approved applicators.

We have an extensive range of floor finishes and commercial surface products that are guaranteed to perform in any workspace - whether it

be **Flowfresh** hygienic floors for food processing areas, **Flowfast** rapid curing floors for fast track installations, **Corrosion Protection** chemical resistant floors or decorative floor finishes that offer design flexibility - we have all the floor finishes you need for every occasion.

Hidden from sight our **Isocrete Floor Screeds** provide time proven strength that guarantees structural integrity and longevity for any building. Fast, strong, safe and sustainable - our screeds use by-products from heavy industry waste streams and reduce clean water consumption in screed construction to meet high environmental standards.

Our **Isowarm Under Floor Heating** system provides invisible, controllable heat, delivering economic, environmental and efficiency savings. Unlike traditional heating systems Isowarm supplies heat where it is needed the most - from the ground up, whilst offering the benefit of a safer, more hygienic and energy saving environment. Our pioneering **Acoustic Flooring Solution, Isocrete Acoustic K** is designed to significantly reduce noise levels within multi-purpose and multi-occupancy buildings.

New Products include **FlowSport** - made from recycled tyres, this hygienic, seamless sports floor is ideal for any gym or leisure centre facility. Our most recent innovation is **Floorgraphix** - a completely bespoke piece of floor graphic artwork; digitally generated personally for you, printed onto rolls of specialist material then sealed into the floor using Flowfast standard seal.

The FLOORZONE Solution

For technical information or advice on any of our specialist seamless flooring products, please call our flooring advisory line on: **+44 (0)1270 753 000**.
