

# Air Curtains

## JS Air Curtains

JS offers a comprehensive range of air curtains for all applications. Standard models, versatile colour options, fully bespoke design, industrial, chill store and systems for rotating doors.

### Comtesse

This elegant air curtain has a stylish oval design and built-in lighting system. An innovative "hot wire" heating system brings the unit to temperature within 10 seconds.

### Bespoke Design

JS Air Curtains links technology to design. The result is beautifully designed units that enhance and complement any entrance.

### Zen

This stylish air curtain can be fitted with bespoke fascia panels that can provide a corporate branding opportunity or add to the functionality of the air curtain by including clocks or signage.

### Rund

Very attractive, cylindrical design with a choice of many bespoke mounting options. Available in stainless steel or any RAL colour, this model can be mounted horizontally above an entrance or vertically at the sides.

### Intense

A stylish air curtain with many options including different colour strip lighting, scent cartridges and a germicidal UV light for air purification. Fast-acting wire heating elements reach temperature rapidly and use less energy than standard electric heating elements.

### Windbox

This attractive air curtain has powerful air and heating outputs, making it suitable for use on doorways up to 3.5m high. It can be used both horizontally and vertically.

### Finesse for suspended ceiling

The Finesse recessed air curtain fits neatly into a suspended ceiling system, has easy access for servicing, a subtle design and is simple to install.

### RotoWind for revolving doors

Individually tailored to suit the revolving door in question. The RotoWind will stop a revolving door from acting like a slow moving fan.

### Kool for cold stores

For use on chill stores, cold stores and freezers. The Kool provides an ambient seal across the opening of refrigerated stores to prevent cold air from escaping and warm air from entering.

### Windbox Industrial

This unit has extremely high outputs making it suitable for doorways up to 7m high. The units are available in lengths up to 3m long and can be mounted horizontally above an entrance or vertically at the sides.
