

Levolux

Levolux offers a comprehensive range of Solar Shading systems that are designed to control light, heat and glare. As the UK's leading Solar Shading specialist, Levolux is able to provide standard or bespoke solutions for new or existing buildings and for interior and exterior applications. All our products are extremely versatile and can help to improve the energy efficiency of buildings.

Brise Soleil

The Matrix XL Brise Soleil system is effective over large spans and offers maximum outward visibility. Other benefits include:

- High performance Solar Shading
- Unique 'Walk-on' option allows easy external access for maintaining high-rise structures

Infiniti® Fin System

An innovative and flexible external shading system, designed to create a clean, continuous aesthetic. It provides the following benefits:

- Concealed fixings
- Clean, continuous appearance
- Extensive range of Fin profiles, available in aluminium or timber

Triniti® Bracket

A revolutionary Solar Shading support system for curtain walling, that offers the following benefits:

- Incorporates unique thermal & acoustic break
- Superior structural integrity
- The Triniti® RF Bracket can be retro-fitted to existing buildings without removing the glazing

Aerofoil Fins

Levolux offers an extensive range of Fins for high performance shading and an impressive aesthetic. They offer the following benefits:

- Significant reductions in solar heat gain
- Available in a range of materials, including aluminium, timber, glass and polycarbonate
- Systems can be fixed, operable or fully automated

Rackarm Systems

Extremely versatile, non-retractable Solar Shading with wide-ranging benefits, including:

- Can be installed internally or externally
- Standard or interlocking slats for effective light control
- Can be applied to horizontal, inclined & irregular shaped glazing

Ventilation & Screening Louvres

Efficient sight-line screening, ventilation and weather protection to plant room areas. A host of benefits, including:

- Wide range of profiles, sizes & finishes to suit specific applications
- Standard or high performance systems
- Virtually maintenance free, with aluminium & stainless steel components

Custom Solutions

Levolux is renowned for offering a creative, flexible approach to system architecture. It has unrivalled expertise in developing custom solutions with fully integrated, highly complex functionality. This has included integrating LED lighting, photovoltaic cells, specialist lighting controls and engineering unique solutions for high profile projects.

Blinds

Manual or motorised, the Levolux range includes internal and external fabric Roller and Venetian Blinds, internal Vertical Louvre and Room Darkening Blinds.

Controls

Levolux offers a complete range of electronic control systems using programmable logic controllers (PLCs). Levolux control systems can also be linked to a Building Management System (BMS).

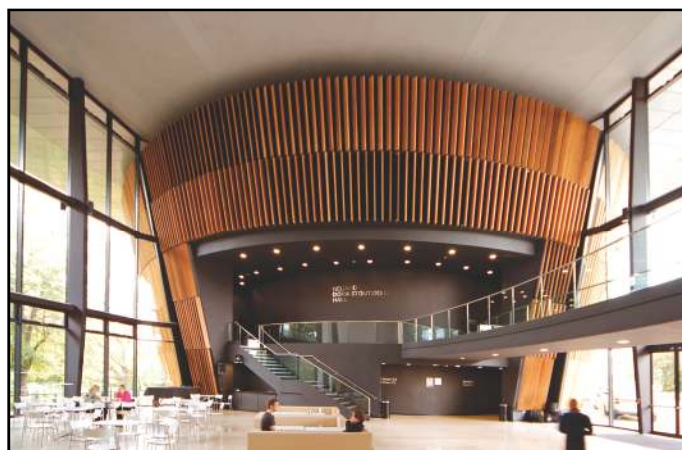

Other Products Also Available: An extensive range of curtains and tracks and stretched acoustic fabric walling.
