Special Products

A highly experienced design team equipped with the latest CAD facilities provides our clients with an expert design service.

We manufacture specialist products from adaptations to standard products to specialist bespoke commercial and architectural luminaires.

New Factory

In July 2011 we re-located to a new, purpose built 22,000 square foot factory and office unit in Bishop's Stortford.

Featured Products

M8: Pre-wired lighting system available in suspended or recessed formats. Delivered fully assembled with reflectors, lamps, louvres or diffusers installed. Can be manufactured in various lengths and configurations allowing clients to tailor the product to suit their own requirements. Supplied in up to 4.8m lengths aiding installation time.

Lexilume: Utilising TL5 sources, the clean lines of Lexilume, with white or clear matt lighting elements, give designers an uncomplicated option to achieve Part L2a compliance and a bright interior. Ideal for high angle illumination in office and retail environments.

Chute/HBX LED: LED decorative pendant luminaires incorporating Philips Fortimo DLM LED arrays. Integral electronic drivers with option of DALI control.

LED Downlight: A range of LED downlights utilising Philips LED Engines and drivers. The 22W LED unit delivers 2000 lumens with a colour temperature of 4000K, a lifetime of 50,000 hours and an LOR of 87%. Matt or specular aluminium reflectors and various decorative attachment options are available.

Kudos LED Display: Kudos is an extensive range of adjustable LED display luminaires utilising 33W and 15W Bridgelux arrays. The range encompasses single and multilamp gimballs, recessed scoops and track mounted spotlights.

Comprehensive Catalogue: A comprehensive catalogue detailing all our standard products is available on request.
