

Packaged Air Conditioning / AHUs

Weatherite

The Company

With over 40 years expertise, Weatherite has become synonymous with the design and manufacture of bespoke, quality, packaged air conditioning equipment for all sectors of industry.

Rather than supplying an off the shelf product, which may or may not offer the right solution, we work closely with the client to provide innovative, energy efficient, low carbon, low maintenance solutions-built and pre-tested in our state of the art production facilities based in the West Midlands.

The expertise gained over the last 40 years helps ensure Weatherite remain at the forefront of the UK air conditioning industry and our philosophy of continual investment in the latest technology, systems, products, equipment and people ensures we remain leaders in the field.

Fully Packaged Rooftop Air Conditioning Units

Weatherite's energy efficient bespoke packaged air conditioning units are designed to satisfy the fast build requirements of today's highly competitive construction industry.

Our units are manufactured and fully tested within the factory prior to delivery, minimising on site disruption, time and associates costs.

Incorporating the latest energy efficient components, many of our packaged designs include free cooling capabilities, enhanced energy management and remote web-enabled controls - delivering exceptional performance and cost savings.

Cooling for Data Centres / Telecoms

Advanced, energy efficient, low carbon, direct outside air free cooling solutions to meet today's highly demanding Data Centre / Telecoms sectors. With over 5,000 installations successfully completed to date we design, manufacture and if required fully install and service and maintain high precision, free-cooling, fully packaged, low energy, highly efficient cooling units.

Packaged Air Handling Units

We offer a comprehensive range of bespoke, quality, high performance air handling units, incorporating the latest energy saving, low noise, low maintenance technology. All our air handling units are designed to minimise life cycle costs whilst providing long term reliability and sustainability. Whether it's new build or refurbishment, we can offer exactly the right solution.

Packaged Plant Rooms

From initial discussions with the client through to design, manufacture, testing and final hook up on site, we construct each of our plant rooms to provide the client with exactly the services they require, whether that be heating plant, air conditioning and refrigeration equipment, heat recovery, CHP, CCHP, etc. Off-site fabrication also offers true sustainability because it reduces waste, improves health and safety, cuts costs and delivers a pre tested, quality end product.

Trigeneration Energy Centres (CCHP)

Weatherite is leading the way in delivering energy saving, low carbon, sustainable, 'Combined Cooling, Heating and Power' solutions. Trigeneration Energy Centres have been developed utilising the latest energy efficient and carbon reducing technology to deliver a highly efficient, cost saving energy centre capable of delivering electricity, hot water, air conditioning and refrigeration heat rejection - all from one single, local, source.

Heat Recovery

We offer a comprehensive range of heat recovery products offering high efficiency, low energy, low noise solutions. We can supply units in stacked or horizontal configurations, providing the most effective solution and all our equipment offers easy installation, quick commissioning and low maintenance as standard.

Full Technical Support

As part of our extensive customer support services we provide a comprehensive technical support facility with fully trained engineers together with a complete range of technical manuals and support literature.
